Organic peroxides.

(A) Section 39016201 General

(1) 3901.16201.1 Scope. The storage and use of organic peroxides shall be in accordance with this rule and rule 1301:7-7-271301:7-7-50 of the Administrative Code.

Unclassified detonable organic peroxides that are capable of detonation in their normal shipping containers under conditions of fire exposure shall be stored in accordance with rule 1301:7-7-271301:7-7-56 of the Administrative Code.

(2) 3901.26201.2 Permits. Permits shall be required for organic peroxides as set forth in rule 1301:7-7-01 of the Administrative Code.

(B) Section 39026202 Definition

(1) 3902.16202.1 Definition. The following word and term shall, for the purposes of this rule and as used elsewhere in this code, have the meaning shown herein as defined in rule 1301:7-7-02 of the Administrative Code.

“Organic peroxide.” An organic compound that contains the bivalent -O-O- structure and which may be considered to be a structural derivative of hydrogen peroxide where one or both of the hydrogen atoms have been replaced by an organic radical. Organic peroxides can present an explosion hazard (detonation or deflagration) or they can be shock sensitive. They can also decompose into various unstable compounds over an extended period of time.

“Class I.” Describes those formulations that are capable of deflagration but not detonation.

“Class II.” Describes those formulations that burn very rapidly and that pose a moderate reactivity hazard.

“Class III.” Describes those formulations that burn rapidly and that pose a moderate reactivity hazard.

“Class IV.” Describes those formulations that burn in the same manner as ordinary combustibles and that pose a minimal reactivity hazard.

“Class V.” Describes those formulations that burn with less intensity than ordinary combustibles or do not sustain combustion and that pose no reactivity hazard.

“Unclassified detonable.” Organic peroxides that are capable of detonation. These peroxides pose an extremely high explosion hazard through rapid explosive decomposition.

(C) Section 39036203 General requirements

(1) 3903.16203.1 Quantities not exceeding the maximum allowable quantity per control area. The storage and use of organic peroxides in amounts not exceeding the maximum allowable quantity per control area indicated in paragraph (C)(1)(2703.15003.1) of rule 1301:7-7-271301:7-7-50 of the Administrative Code shall be in accordance with paragraphs (A)(2703.15001) and (C)(2703.15003) of rule 1301:7-7-271301:7-7-50 of the Administrative Code and paragraphs (A)(39016201) and (C)(39036203) of this rule.

(a) 3903.1.16203.1.1 Special limitations for indoor storage and use by occupancy. The indoor storage and use of organic peroxides shall be in accordance with paragraphs (C)(1)(a)(i)(3903.1.1.16203.1.1.1) to (C)(1)(a)(iv)(3903.1.1.46203.1.1.4) of this rule.

(i) 3903.1.1.16203.1.1.1 Group A, E, I or U occupancies. In Group A, E, I or U occupancies, any amount of unclassified detonable and Class I organic peroxides shall be stored in accordance with the following:

(a) Unclassified detonable and Class I organic peroxides shall be stored in hazardous materials storage cabinets complying with paragraph (C)(8)(g)(2703.6.75003.8.7) of rule 1301:7-7-271301:7-7-50 of the Administrative Code.

(b) The hazardous materials storage cabinets shall not contain other storage.

For copyright claim information, please see the notice attached to the last page of this rule.
1301:7-7-3962

(ii) **3903.1.1.2 Group R occupancies.** Unclassified detonable and Class I organic peroxides shall not be stored or used within Group R occupancies.

(iii) **3903.1.1.3 Group B, F, M or S occupancies.** Unclassified detonable and Class I organic peroxides shall not be stored or used in offices, or retail sales areas of Group B, F, M or S occupancies.

(iv) **3903.1.1.4 Classrooms.** In classrooms in Group B, F or M occupancies, any amount of unclassified detonable and Class I organic peroxides shall be stored in accordance with the following:

(a) Unclassified detonable and Class I organic peroxides shall be stored in hazardous materials storage cabinets complying with paragraph (C)(8)(g) of rule 1301:7-7-271301:7-7-50 of the Administrative Code.

(b) The hazardous materials storage cabinets shall not contain other storage.

(2) **3903.26203.2 Quantities exceeding the maximum allowable quantity per control area.** The storage and use of organic peroxides in amounts exceeding the maximum allowable quantity per control area indicated in paragraph (C)(1) of rule 1301:7-7-271301:7-7-50 of the Administrative Code shall be in accordance with rule 1301:7-7-271301:7-7-50 of the Administrative Code and this rule.

(D) **Section 3904.6204 Storage**

(1) **3904.16204.1 Indoor storage.** Indoor storage of organic peroxides in amounts exceeding the maximum allowable quantity per control area indicated in Table 2703.1.5003.1.1 of rule 1301:7-7-271301:7-7-50 of the Administrative Code shall be in accordance with paragraphs (A)(2703.15003.1), (C)(2703.5003) and (D)(2704.5004) of rule 1301:7-7-271301:7-7-50 of the Administrative Code and this rule.

Indoor storage of unclassified detonable organic peroxides that are capable of detonation in their normal shipping containers under conditions of fire exposure shall be stored in accordance with rule 1301:7-7-331301:7-7-56 of the Administrative Code.

(a) **3904.1.16204.1.1 Detached storage.** Storage of organic peroxides shall be in detached buildings where required in paragraph (C)(8)(b) of rule 1301:7-7-271301:7-7-50 of the Administrative Code.

(b) **3904.1.26204.1.2 Distance from detached storage buildings to exposures.** In addition to the requirements of the building code as listed in rule 1301:7-7-471301:7-7-80 of the Administrative Code, detached storage buildings for Class I, II, III, IV and V organic peroxides shall be located in accordance with Table 3904.1.26204.1.2 of this rule. Detached buildings containing quantities of unclassified detonable organic peroxides in excess of those set forth in Table 5003.8.2 of rule 1301:7-7-50 of the Administrative Code shall be located in accordance with Table 5604.5.2(1) of rule 1301:7-7-56 of the Administrative Code.

### Table 3904.1.26204.1.2

<table>
<thead>

</table>

For SI: 1 foot = 304.8 mm, 1 pound = 0.454 kg.

a. **WhenWhere** the amount of organic peroxide stored exceeds this amount, the minimum separation shall be 50 feet.
(c) **3904.1.3 Liquid-tight floor.** In addition to the requirements of paragraph (D)(12) of rule 1301:7-271301:7-7-50 of the Administrative Code, floors of storage areas shall be of liquid-tight construction.

(d) **3904.1.4 Electrical wiring and equipment.** In addition to the requirements of paragraph (C)(9)(d) of rule 1301:7-271301:7-7-50 of the Administrative Code, electrical wiring and equipment in storage areas for Class I or II organic peroxides shall comply with the requirements for electrical Class I, Division 2 locations.

(e) **3904.1.5 Smoke detection.** An approved supervised smoke detection system in accordance with paragraph (G)(907) of rule 1301:7-7-09 of the Administrative Code shall be provided in rooms or areas where Class I, II or III organic peroxides are stored. Exception: A smoke detection system shall not be required in detached storage buildings equipped throughout with an approved automatic fire-extinguishing system complying with rule 1301:7-7-09 of the Administrative Code.

(f) **3904.1.6 Maximum quantities.** Maximum allowable quantities per building in a mixed occupancy building shall not exceed the amounts set forth in Table 2703.8.2 of rule 1301:7-7-271301:7-7-50 of the Administrative Code. Maximum allowable quantities per building in a detached storage building shall not exceed the amounts specified in Table 3904.1.2 of this rule.

(g) **3904.1.7 Storage arrangement.** Storage arrangements for organic peroxides shall be in accordance with Table 3904.1.7 of this rule and shall comply with all of the following:

(i) Containers and packages in storage areas shall be closed.

(ii) Bulk storage shall not be in piles or bins.

(iii) A minimum 2-foot (610 mm) clear space shall be maintained between storage and uninsulated metal walls.

(iv) Fifty-five-gallon (208 L) drums shall not be stored more than one drum high.

</tbody>
</table>

For SI: 1 foot = 304.8 mm.

a. At least Not less than one main aisle with a minimum width of 8 feet shall divide the storage area.

b. Distance to noncombustible walls is allowed to be reduced to 2 feet.

c. See Table 3904.1.2 of this rule for maximum quantities.

d. The distance shall not be less than one-half the pile height.

(h) **3904.1.8 Location in building.** The storage of Class I or II organic peroxides shall be on the ground floor. Class III organic peroxides shall not be stored in basements.

(i) **3904.1.9 Contamination.** Organic peroxides shall be stored in their original DOTn shipping containers. Organic peroxides shall be stored in a manner to prevent contamination.
**1301:7-7-3962**

(j) **3904.1.106204.1.10 Explosion control.** Indoor storage rooms, areas and buildings containing unclassified detonable and Class I organic peroxides shall be provided with explosion control in accordance with paragraph (K)(911) of rule 1301:7-7-09 of the Administrative Code.

(k) **3904.1.116204.1.11 Standby power.** Standby power shall be provided in accordance with paragraph (D)(604) of rule 1301:7-7-06 of the Administrative Code shall be provided for the following systems used to protect storage areas of Class I and unclassified detonable organic peroxide.

1. Exhaust ventilation system.
2. Treatment system.
3. Gas detection system.
4. Smoke detection system.
5. Temperature control system.
6. Fire alarm system.
7. Emergency alarm system.

(l) **6204.1.11.1 Fail-safe engineered systems.** Standby power shall not be required for mechanical exhaust ventilation, treatment systems and temperature control systems where approved fail-safe engineered systems are installed.

(2) **3904.26204.2 Outdoor storage.** Outdoor storage of organic peroxides in amounts exceeding the maximum allowable quantities per control area indicated in Table 2704.1.25003.1.1 (3) of rule 1301:7-7-271301:7-7-50 of the Administrative Code shall be in accordance with paragraphs (A)(27015001), (C)(27035003) and (D)(27045004) of rule 1301:7-7-271301:7-7-50 of the Administrative Code and this rule.

(a) **3904.2.16204.2.1 Distance from storage to exposures.** Outdoor storage areas for organic peroxides shall be located in accordance with Table 3904.1.25004.1.2 of this rule.

(b) **3904.2.26204.2.2 Electrical wiring and equipment.** In addition to the requirements of paragraph (C)(9)(d)(2703.9.45003.9.4) of rule 1301:7-7-271301:7-7-50 of the Administrative Code, electrical wiring and equipment in outdoor storage areas containing unclassified detonable, Class I or II organic peroxides shall comply with the requirements for electrical Class I, Division 2 locations.

(c) **3904.2.36204.2.3 Maximum quantities.** Maximum quantities of organic peroxides in outdoor storage shall be in accordance with Table 3904.1.25004.1.2 of this rule.

(d) **3904.2.46204.2.4 Storage arrangement.** Storage arrangements shall be in accordance with Table 3904.1.25004.1.7 of this rule.

(e) **3904.2.56204.2.5 Separation.** In addition to the requirements of paragraph (C)(9)(h)(2703.9.45003.9.8) of rule 1301:7-7-271301:7-7-50 of the Administrative Code, outdoor storage areas for organic peroxides in amounts exceeding those specified in Table 2703.8.25003.8.2 of rule 1301:7-7-271301:7-7-50 of the Administrative Code shall be located a minimum distance of 50 feet (15 240 mm) from other hazardous material storage.

(E) Section 39056205 Use

(1) **3905.16205.1 General.** The use of organic peroxides in amounts exceeding the maximum allowable quantity per control area indicated in Table 2703.1.45003.1.1(1) or 2703.1.45003.1.1(3) of rule 1301:7-7-271301:7-7-50 of the Administrative Code shall be in accordance with paragraphs (A)(27015001), (C)(27035003) and (E)(27055005) of rule 1301:7-7-271301:7-7-50 of the Administrative Code and this rule.
